FIMA-WAMY HOLD ITS 24th STUDENTS CAMP IN KARANGANYAR, INDONESIA

**From Expectations to Purpose Reflections from the FIMA
International Camp, Karanganyar, Indonesia**

Arriving with Expectations

I arrived in Indonesia expecting something completely different from what I eventually experienced. Before leaving Canada, I imagined a conference-style event where medicine would be the primary focus and Islam would simply be the common characteristic connecting everyone in attendance. I pictured hotel conference rooms, networking sessions, and discussions centred almost entirely on healthcare. Instead, I stepped into a true camp nestled in the hills of Karanganyar. To someone from Canada, especially after nearly thirty-eight hours of travelling, the first impression was overwhelming. Our original twenty-six-hour itinerary became much longer after flight delays caused us to miss our connections. We spent an extra twelve hours exhausted, hungry, and trying to navigate airports with very little assistance from the airline. By the time we finally reached Indonesia, boarded another domestic flight, and completed the bus ride

@wamy f wamysaudia 920011000

Editor: Dr. Tanveer Zubairi, Ex. President, FIMA | **Assistant Editor:** Sajjad Saleem
Prof. Dr. Abdul Rashid Abdul Rahman, President, FIMA | Dr. Eka Ginanjar, General Secretary, FIMA

into the countryside, every inconvenience felt amplified. The camp itself was another surprise. The rooms were much smaller than I expected, there was no air conditioning, insects were everywhere, and the environment was far more rural than anything I had imagined. At first, I genuinely wondered how we were going to spend five days there. Looking back now, I'm almost embarrassed that those were my first thoughts because those same surroundings eventually became some of my favourite memories. One of the biggest reasons I chose to travel from Canada was because opportunities like this are

incredibly rare. Muslim physicians represent only a small percentage of doctors where I live, and as medical students, a fellow medical student and I are among the few hijabi women in our environment. Balancing medicine while remaining true to Islamic values can sometimes feel isolating. I hoped this camp would provide not only professional inspiration, but also spiritual renewal and a chance to meet people who understood that journey. It exceeded every one of those hopes.

Tourism Day - My Favourite Memory

The greatest surprise wasn't the scenery-it was the people. Meeting Muslim healthcare students and professionals from across the world showed me just how diverse our Ummah truly is. Although we all shared the same faith, every country approached medicine, education, leadership, and service differently. Those conversations challenged many of my assumptions and reminded me that diversity is one of our greatest strengths. The social programs became the highlight of the week. While I appreciated the scientific lectures, I found the informal activities even more impactful because they created genuine

Mr President on FIMA introduction

Turkish team for Student Camp 2026

Turkish team for Student Camp 2026

conversations rather than one-way presentations. Tourism Day was my favourite experience. Riding through the forests together, laughing, taking photos, and appreciating Indonesia's natural beauty created memories that no lecture could replace. Cultural Night, evening gatherings, sports, and simply staying up late with the sisters after the program had officially ended transformed strangers into lifelong friends.

Faith, Humanity & Looking Forward

Perhaps the greatest impact of this camp was spiritual rather than academic. Beginning each day

with Fajr, Qur'an, and remembrance of Allah changed the rhythm of daily life. In Canada I pray regularly, but it is uncommon for an entire community to naturally organize every activity around prayer. Experiencing that atmosphere strengthened my identity as a Muslim woman in medicine and reminded me that faith should guide every aspect of our profession.

Our South Sudan maternal health project further reinforced that lesson. Sitting around one table with participants from different countries, each bringing unique experiences and ideas,

demonstrated the incredible potential of international collaboration. Together we developed solutions that none of us would have reached independently. It gave me hope that Muslim healthcare professionals can create lasting change if we continue working together beyond events like this.

Indonesia also taught me to appreciate simplicity. What initially felt unfamiliar gradually became peaceful. The greenery, the prayer spaces, the hospitality of the staff, and the slower pace of life encouraged gratitude and reflection.

IMASA student delegates to the 24th FIMA Student Camp

Mr President @Unknown user conducts ice breaking sessions on our way to Student Camp venue

Saudi Delegates- Riyadh Batch

I left with renewed motivation to pursue humanitarian work internationally and to become the kind of physician who serves patients with excellence while representing Islam through compassion, humility, and character.

If someone asked me why they should attend the next FIMA International Camp, I would simply say this: come with an open heart. You may arrive expecting a conference, but you will leave with lifelong friendships, renewed faith, and a deeper understanding of what it truly means to serve humanity as a Muslim healthcare professional.

44TH ANNUAL IMASA CONVENTION 2026

ARE WE SCREENING SMARTER... OR JUST SCREENING MORE?

What happens after the screening result? Which patients need urgent referral? Who should be investigated further? And how do we identify those at greatest risk before disease progresses?

Join an exceptional multidisciplinary panel as they unpack the latest evidence, practical approaches and real-world challenges in medical screening across multiple specialties.

Meet our Expert Panel:

- Dr Farouk Mamdoo – Cardiologist
- Dr Nasrin Goolam Mahyooddeen – Endocrinologist
- Dr Razina Patel – Fertility Specialist

- Prof Nasreen Mahomed – Radiologist Nasreen Mahomed
- Dr Lindsay Lambie – Clinical Geneticist
- Dr Shabbir Hussain – Ophthalmologist
- Dr Shoyab Wadee – Nephrologist Shoyab Wadee

Whether you're a GP, specialist, intern, allied healthcare professional or student, this interactive session will provide valuable clinical insights you can apply in your daily practice.

44TH IMASA CONVENTION JOHANNESBURG

SCREENING SESSION

Predict the risk, Prevent the disease.

Cardiovascular disease burden with the rising prevalence in obesity, hypertension, endocrine disruptors and psychosocial stressors, coupled with more frequent incidence of new and recurrent carcinoma, often surprises clinicians when presenting for the first time in known, seemingly healthy individuals.

Expensive non-invasive and invasive testing for everything and everyone is not feasible.

What and in whom should warrant investigation? What are the clues and risk factors to be actively sought?

SCREENING FOR DISEASES

Join our scientific Screening Session where we seek to identify core principles in early detection of disease in cardiovascular, gynaecologic, endocrine, renal, genetic and ophthalmic conditions and rationalize screening, surveillance and maintenance algorithms for assisting in the management of some of these conditions.

MAKE YOUR VOICE HEARD: RESEARCH STUDY ON GENETIC COUNSELING

We are sharing an important research opportunity from the Medical College of Wisconsin. They are currently recruiting U.S. Muslim men and women to participate in a study exploring perspectives on genetic counseling and genetic testing through an Islamic lens.

Eligibility Requirements:

- Identifies as a practicing Muslim
- Living in the U.S.
- At least 18 years old

- Able to speak and understand English

What does it include?

Participants will complete a demographic survey and choose between a focus group (~2 hours) or a one-on-one interview (~1 hour). As a thank you for your time, participants who complete both the survey and the interview/focus group will receive a \$40 gift card!

To participate: Scan the QR code to access the survey.

For any questions, please email Sofia Sheikh at ssheikh@mcw.edu.

Research Study on Muslim perceptions on Genetic Counseling

Our study is recruiting U.S. Muslim Men and Women to participate in focus groups where we share scenario questions to hear participants' understandings and perspectives of Genetic counseling and genetic testing through an Islamic lens.

Eligibility

- Identifies as a practicing Muslim
- Living in the U.S.
- At least 18 years old
- Able to speak and understand English

What does this include?

- A demographic survey
- Able to participate in a focus group (~2 hours) OR one-on-one interview (~1 hour)
- Add preferred contact and availability for the focus group/ on-on-one interview

Interested?

Scan the QR Code for the survey

Questions?

Email Sofia Sheikh at ssheikh@mcw.edu

Participants who complete the survey and focus group OR interview will be given a \$40 gift card

IMA MAURITIUS HOLDS FREE MEDICAL CAMP IN MENAATCHEE NURSING HOME

Our recent health screening at Meenatchee Home was more than just checking blood pressure and blood sugar—it was about caring for our elders with dignity, compassion and professionalism.

A heartfelt thank you to the management and staff of Meenatchee Home for their warm hospitality, our dedicated

doctors, allied health professionals and volunteers for giving their time, and to everyone who supported this initiative.

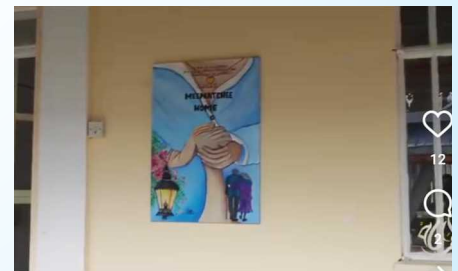

Together, we continue to serve our community, one patient at a time.

"The best of people are those who are most beneficial to

others."

REMAINING MESSAGE OF THE PRESIDENT

through this newsletter, we attempt to edify health care professionals about ongoing project and contemporary universal issues. FIMA projects reports, regional director's navigations and individual IMAs activities are highlighted aiming at learning from the experiences of each other's, collaborating at various echelons, gaining insights about needs in certain regions and how we can come up with the solution of unsolved healthcare issues in general. I steel this opportunity to remind and sincerely once again invite you all to participate in the forthcoming FIMA council meeting and FIMA-TIMA scientific conference to be held on September 2-6, 2026 at Hat Yai- a major commercial city located in the Southern Region of Thailand. We strongly hope and believe that this will be a memorable meeting where innovative thoughts to improve the healthcare outcome will be introduced.

During early August, 26, we met with 200 medical students from over 15 countries at central Java- Indonesia. Avery successful student camp organized by FIMASAC (FIMA Students' Advisory Committee or FIMA Medical Students Section) in collaboration with IMASKA and sponsored by World Assembly of Muslim Youth (WAMY). Multi-dimensional training program well-matched to enhance the professional competencies and soft skills of the young professionals spanned over a week-long wide-ranging activity attended by male and female

medical students. A detail report on this camp will be presented by the Director FIMASAC. Other FIMA projects like CIMCO and Save Dignity, despite having wide scope and opportunities mandate the attention of all IMAs. All FIMA projects are finely planned to meet the ominous needs of our societies and communities. IMA leadership while planning and prognosticating their future must look in to the national and global requirements and trends and how FIMA projects can be conformed to boost the national cause in their respective countries. I profoundly urge all IMAs to please come up with your future planes while presenting in the council meeting, and please accentuate due consideration to FIMA projects while executing action planes in your respective IMAs. I strongly vouch to all IMAs leadership to please send your activities reports with pictorial evidences to be published in FIMA News latter. Your this contribution will undeniably will incentivize other IMAs to follow your footsteps.

I pray to Almighty Allah for the wellbeing and success of all our brothers and sisters.
